Brief explanation

All Photography was taken using an APS-C sensor SLR camera fitted with a 35mm fixed focus lens. This gives an equivalent 35mm full-frame standard lens field of view which is 52mm. This is considered to be the closest to the average human eye field of view. All photographs were taken at an eye height of 1.65m above ground level during February and March 2021.

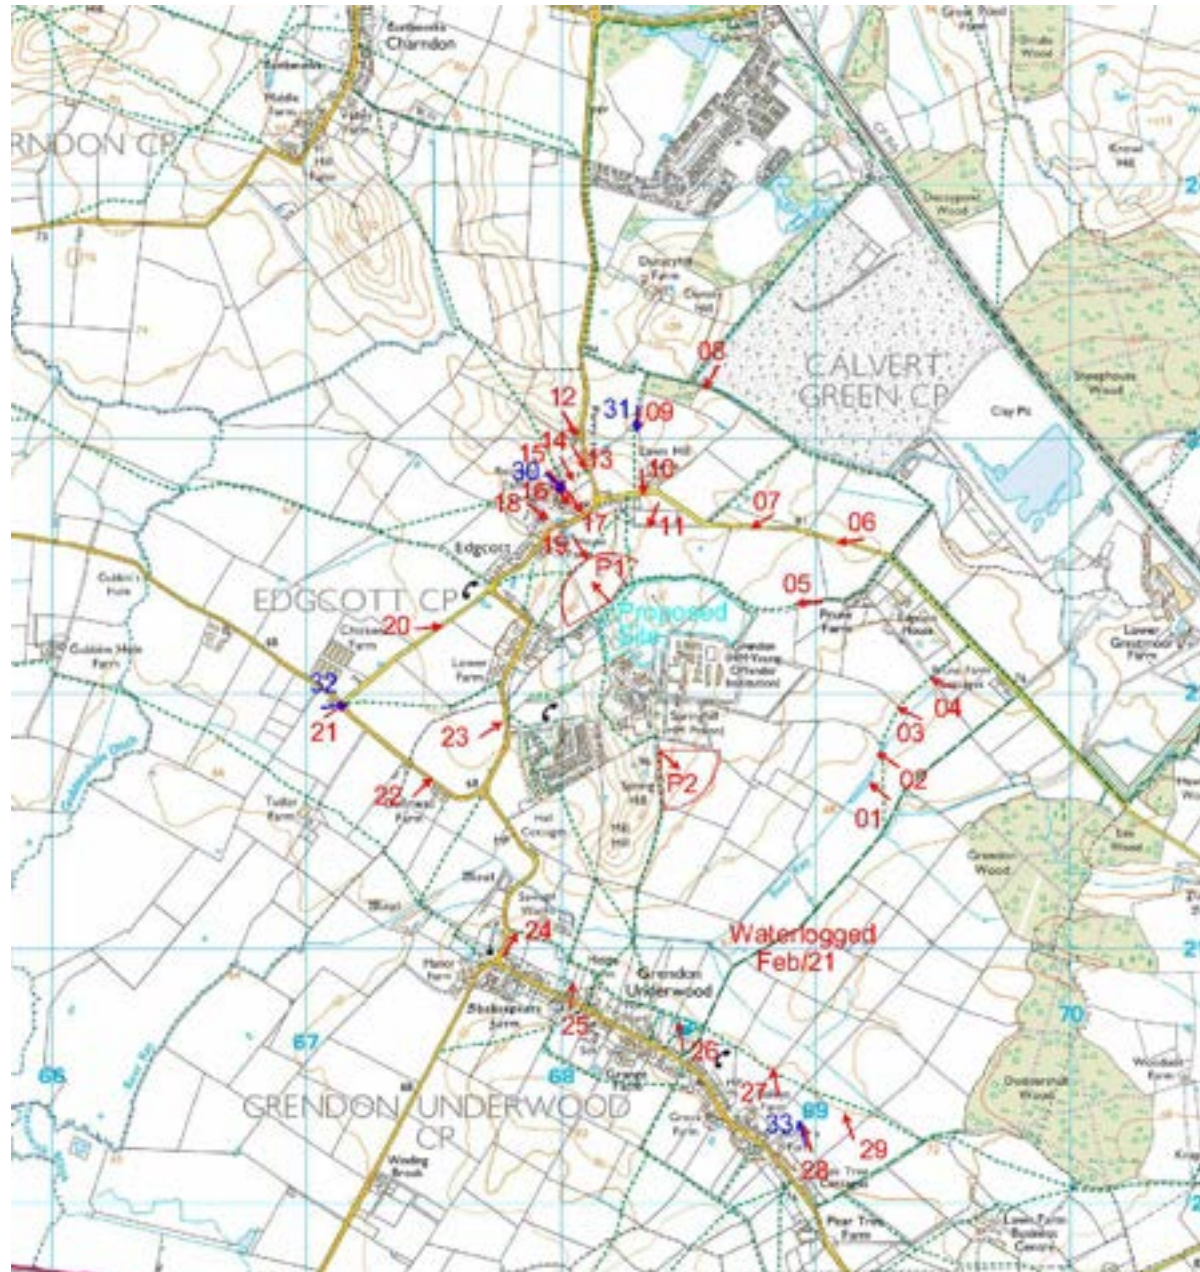

Night time photographs were taken using an exposure which best shows what the "dark adapted" human eye would see.

The two panoramic views have been taken from close to the prison boundary. From anywhere within the landscape of the panorama, at least part of the prison will be visible.

The visual impact on Lawn House, Lawn House Lane, Edgcott is included in a separate document.

Photography and document produced by Martin J. Rogers.
